

Sept 19, 2021

Dear Client,

Greetings

We are a group of 3rd year students from UST , studying B.S. Information Systems program in College of Information and Computing Sciences. As part of our project in Applications Development & Emerging Technologies 2(Enterprise Back-end), we would like to ask for your help in getting the data we need for the database in which will be integrated later on with the website application we are going to create. We just need our client to fill-up the excel provided or in any form more convenient as long as it contains the listed data.

The information that we need are the following:

- List of products and its corresponding :
 - short description (weight, sizes, version, specifics etc)
 - brands
 - suppliers (name and address)
 - type or category
 - selling price

Thankyou very much.

Ellah Nicole Chua

Database Developer
